

Tutor Doctor is already experiencing high demand for educational support for students this school year and is actively looking to build its roster of tutors who have specialities at the Junior High, High School and Elementary levels. Currently, we are in desperate need for Junior High and High School level math and science tutors along with tutors who also have strong French and English skills.

Tutor Doctor Specializes in One on One, In-Home Tutoring Programs and services the entire HRM. This is a great opportunity for students who would like to take on one, two or even more students while studying or while substituting or working as a part-time educator. You can choose the contracts you accept and can work as few or as many hours as you would like. Tutoring typically takes place in evenings and weekends.

Ability to travel to customers homes important and therefore must live in Halifax or surrounding areas and able to get around or have access to a car. Looking for commitment to students throughout the school year in order to make a real difference in our community.

Please note this is a paid opportunity. Renumeration based on qualifications and experiences.

If interested, please visit our local website for more information: www.yourtutordocor.com/kwhitham and forward your resume to kwhitham@tutordocor.com

Sincerely,

Kay Marie Whitham

Education Consultant
