Current Atlantic Node Research Projects
Projets de recherche actuellement en cours au Centre de l’Atlantique

N.1 Mount St. Vincent University Library project I: Social Economy Subject Guide
N.2 Library Project II – Web-based research tool for Social Economy Academic
N.3 Mapping the Social Economy with Mi’kmaq communities
1.1 Survey of Co-ops and Credit Unions in Atlantic Canada
1.2 Atlantic Node Community Partners’ Profiles
1.3 Fishing for the Future II: Tracking the Coastal Communities Network from First Beginnings to Economic Sustainability
1.4 Les politiques gouvernementales comme support aux organismes communautaires de gestion viable des groupes de bassins versants: analyses des politiques et recommandations
1.5 Profil de l’ancienne et de la nouvelle économie sociale dans le développement territorial des Îles acadiennes (Lamèque et Miscou)
1.6 Policies that Support Bridging, Bonding and Building between Government and the Social Economy in Atlantic Canada
1.7 SES Research Network Policy Threads Inventory and Analysis
1.8 Cultural Co-operatives in Atlantic Canada: Progress and Governance
2.1 Launching rural women’s entrepreneurship
2.2 Community Accounts – PEI
2.3 Youth Engagement in Hillsborough Park (Global Culture, Local Meanings and Contested Community): Redefining Youth Apathy
2.4 Advocating Changes to Maternity & Parental Benefits Legislation
2.5 The Role of Women in the Fishery and Fisheries Management
2.6 Mapping Supports for the Social Economy
2.7(a) Indigenous Community Development: Phase I – Ethnobotany
2.7(b) Indigenous Community Development: Phase II – Microenterprise
2.7(c) Indigenous Community Development: Phase III – Youth Engagement with Community and Natural Resources
2.8 PEI Organic Farmer-Citizen Co-operative
2.10 Access of Adults with Learning Disabilities to Post-secondary Education
2.11 Internationally Educated Health Professionals in PEI: Why They Come, Why They Stay, and the Challenges They Face
2.14 Beyond Silence
2.17 Community Engagement in Developing Domestic Fair Trade for Food Products
2.18 Quality of Life and Environmental Awareness Survey
3.1 Food Box Program: Current and Potential Contributions to the Social Economy
3.2 Community Forum on Food Security and the Social Economy
3.3 Mobilization around Food Security within the Canadian Social Economy Research Partnerships: A National Scan
3.4 Identification of Barriers and Tools to Support Community Mobilization and Action on Sustainable Food Purchasing Decisions
Partners
Contact Us

3.5 Making Healthy, Local Food Possible: Rural Community Solutions
3.6 Forum on Community Food Security and the Social Economy
4.1 Économie sociale et groupes de bassin-versant sur le littoral acadien
4.2 Participation publique en gestion forestière: Expériences, perceptions et attentes des organismes de l’économie sociale du N-B
4.3 L’utilisation de compost comme pratique visant une plus grande viabilité des sols chez les fermiers du Sud-Est du Nouveau-Brunswick (La Coopérative de la Récolte de Chez-Nous (RCN))
4.4 Acceptabilité sociale des pratiques aquacoles dans le sud du Golfe du St-Laurent
4.5 Nouvelle économie sociale, renforcement des capacités des collectivités côtières dans la livraison de services aux citoyens face à la hausse du niveau marin sur le littoral acadien du Nouveau-Brunswick
4.6 Changements climatiques et plantes médicinales dans les communautés Mi’kmaq d’Eel River Bar et d’Elsipogtog
4.7 Contribution des coopératives d’artisanat autochtone à l’économie des Premières Nations aux provinces maritimes
4.8 Impacts of the NB regulatory process on the small scale cranberry farmer
4.9 Quelles mesures permettraient d’inciter le transport non morisé dans la région du Grand Moncton
5.1 Financing the Social Economy
5.2 Fogo Island Cooperative
5.3 Generally Accepted Accounting Principles (GAAP) and Cooperative Accounting
5.4 Halifax Independent School – Performance Measures
5.5 Diagnostic tool for co-operative firms
5.6 Measuring the Co-op Difference
5.8 Guide to Choosing an Enterprise Form
5.10 Employment Law for Canadian Worker Co-operatives
6.1 Bridges and Pathways, or Detours and Dead Ends: Evaluating a Collaborative Web Community
6.2 Introducing a web community software to a complex social economy organization
6.3 The Development of an Open-Source Web Community Software
6.4 The Uses and Gratifications of Communication Technologies for SE Actors: A survey of Atlantic SE organizations’ use of communications tools
6.5 Community Sector Forum: Testing an inclusive approach to engaging community sector leaders in a discussion about key issues and challenges facing the sector
6.6 But I Sent You the E-mail: Exploring e-mail’s effectiveness as a promotional imedium within the community sector
6.7 Evaluating the Utility of Webinars as an Information and Communications Technology
6.8 Analysis of Community-Based Radio as a Communication Tool for Groups in the Social Economy
5.2 Let Them In, But Keep Them Out: Liminality of the First-born Chinese Prince Edward Islanders (SN1)
5.3 Domestic Violence Research Project (SN2)
5.4 The Policy Context for Co-operatives in New Brunswick. Masters in Philosophy thesis, UNB (SN1)
5.10 Prince Edward Island and Newfoundland: A Comparative Assessment of Two Islands As Viable Destinations for Immigrant Entrepreneurs (SN2)
5.11 Contribution d’une entreprise d’économie sociale à l’alimentation de proximité et à la sécurité alimentaire : le cas de la RCN dans le sud-est du NB (SN4)
5.12 At the intersection of a crisis? Examining the ability of New Brunswick’s non-profit organizations to meet the need for home care in the twenty-first century (SN1)
5.13 Examining the Risk of Lost Knowledge with Personnel Changes in Small Nonprofit Organizations on Prince Edward Island (SN2)

Introduction

The SES/ÉSD Network is premised on active partnership – in research and dissemination activities, and in the governance of our network. Our members work within academic institutions, community organizations and all levels of government. Since our first team meeting in 2006, we have come a long way toward our goals of generating and mobilizing knowledge about the social economy. Approximately 100 team members have coalesced within six research groups across the four Atlantic provinces, and more than 30 students have contributed to our work. Our SSHRC grant has helped us leverage other funding, all of which supports graduate student research assistantships, research activities with our community partner organizations, conference and other presentations, knowledge generation and mobilization, and other Network activities and communications.

In this publication, you will find a brief outline of each of the research projects currently underway or completed. As you will see, a wide variety of learning and dissemination events have taken place. Members of the network have contributed to many local, regional, national and international conferences, addressing a wide range of audiences and creating many new collaborative relationships. Our work is confirming that the region’s social economy undertakings are vital for the continued well-being of its people, and for ongoing sustainable development. It demonstrates the “value added” of using the framework and language of the social economy. Together we are creating social and intellectual capital that will contribute to the success of the SE in our region.

*******

Le réseau SES/ÉSD est fondé sur un partenariat actif en matière d’activités de recherche et de diffusion et dans la gouvernance de notre partenariat. Nos membres travaillent dans des milieux universitaires, dans des organismes communautaires et à tous les niveaux du gouvernement. Depuis la première rencontre des intervenants, en 2006, nous avons fait du chemin vers nos objectifs qui sont de mobiliser la connaissance en matière d’économie sociale. Environ 100 intervenants se sont rassemblés en six groupes de recherche répartis dans les quatre provinces de l’Atlantique et plus de 30 étudiants ont contribué à notre travail. Notre subvention du CRSH nous a aidés à obtenir d’autres financements. Tous ces fonds nous ont permis d’engager des étudiants de cycles supérieurs en tant qu’assistants de recherche, de mener des activités de recherche avec nos partenaires communautaires, d’organiser des congrès et autres présentations, de générer et de mobiliser les connaissances, ainsi que de générer d’autres activités et communications du Partenariat.

Dans la présente publication, vous trouverez un bref aperçu de chacun des projets de recherche en cours à l’heure actuelle ou terminés. Comme vous le verrez, toute une variété d’événements d’apprentissage et de diffusion ont eu lieu. Les membres
du Partenariat ont contribué à de nombreux congrès locaux, régionaux, nationaux et internationaux; ils ont fait des présentations devant des auditeurs variés et ont forgé de nouvelles relations de collaboration. Notre travail confirme que les activités en économie sociale entreprises dans notre région sont vitales pour le bien-être continu de ses habitants et pour un développement durable continu. Il est la preuve qu’on peut bénéficier d’une certaine « valeur ajoutée » quand on utilise le cadre et la langue de l’économie sociale. Ensemble, nous créons un capital social et intellectuel qui contribuera à la réussite de l’économie sociale dans notre région.

Sincerely - Cordialement,

Dr. Leslie Brown, Director-Directrice
Social Economy and Sustainability Research Network- Partenariat sur l’économie sociale et la durabilité
Goals

Atlantic Node Research Goals

The overarching goals of the Atlantic Node are:

- Contributing to the theory and practice of social economy in the Atlantic region
- Internal bridging, bonding, mentoring & capacity building
- Encouraging use of the “social economy” as a framing concept in the region
- Linking Atlantic partners with other parts of Canada and the world

Objectifs

Objectifs de recherche du Centre de l’Atlantique

Les vastes objectifs du Centre de l’Atlantique sont les suivants :

- Contribuer à la théorie et à la pratique de l’économie sociale dans les provinces de l’Atlantique
- Renforcer les liens et les capacités des partenaires
- Encourager l’emploi du terme « économie sociale » en tant que concept cadre dans la région
- Établir des liens entre les partenaires de l’Atlantique et ceux d’autres régions du Canada et du monde

Themes

Atlantic Node Research Themes

Conceptualizing & describing the social economy in Atlantic Canada

- What does the social economy look like? What needs does it address?
- How can we best capture this sector conceptually?
- What, if anything, makes it distinctive or innovative? How interconnected are its facets, & to what effect?
- What are the characteristics of social economy organizations?
- What are the implications for government policy?

Thèmes

Thèmes de la recherche menée par le Centre de l’Atlantique et questions

Conceptualisation et description de l’économie sociale au Canada de l’Atlantique

- À quoi l’économie sociale ressemble-t-elle? Quels sont les besoins auxquels elle répond?
- Quelle est la meilleure manière de capturer ce secteur de façon conceptuelle?
- Qu’est-ce qui rend l’économie sociale distinctive ou innovatrice, si tant est qu’elle le soit? De quelle manière ses diverses facettes sont-elles inter-reliées et quels en sont les effets?
- Quels sont les caractéristiques des organismes d’économie sociale?
- Quelles sont les implications de l’économie sociale en ce qui concerne les politiques gouvernementales?

Policy inventory and analysis

- How are different understandings of “social economy” reflected in government policy?
- What needs are not being met, & what

Inventaire et analyse des politiques

- De quelle manière les divers aspects de l’« économie sociale » se reflètent-ils dans les politiques gouvernementales?
changes are needed in regulatory environment?
- What indicators can we develop to aid in policy development?

***Community mobilization around issues of common concern (natural resources; food security; inclusion and empowerment)***
- Do social economy organizations contribute to social inclusion, the democratization of the economy, & empowerment?
- What inputs are needed to overcome obstacles & build capacity?
- What can we learn from research on mobilization around food security, empowerment & inclusion, community management of natural resources & energy?

***Measuring and Financing the Social Economy***
- What can social accounting, co-operative accounting, social auditing, & other techniques contribute towards a better understanding of the work and contributions of social economy organizations?
- Where do social economy organizations obtain the financing that they need?
- What do social economy organizations contribute toward financing the social economy?

***Modeling & researching innovative, traditional, & IT-based communication and dissemination processes***
- How can social economy actors best communicate?
- What can our Network team members contribute by developing & modeling processes and techniques?
- What can be gained from exploring technology as an equalizer vs. technology as a barrier?
- Quels sont les besoins qui ne sont pas satisfaits et quels changements doivent être apportés aux régulations?
- Quels indicateurs pouvons-nous créer afin de faciliter le développement de politiques?

***Mobilisation communautaire sur des questions d’intérêt commun (ressources naturelles, sécurité alimentaire, inclusion et autonomisation)***
- Les organismes d’économie sociale contribuent-ils à l’inclusion sociale, à la démocratisation de l’économie et à l’autonomisation?
- Quelles sont les éléments qui pourraient permettre de surmonter les obstacles et de renforcer les capacités?
- Que pouvons-nous apprendre de la recherche en matière de mobilisation sur la sécurité alimentaire, sur l’autonomisation et l’inclusion, sur la gestion communautaire des ressources naturelles et de l’énergie?

***Mesure et financement de l’économie sociale***
- De quelle manière la comptabilité sociale, la comptabilité coopérative, la vérification sociale et d’autres techniques peuvent-elles contribuer à une meilleure compréhension du travail et des contributions des organismes d’économie sociale?
- D’où provient le financement dont les organismes d’économie sociale ont besoin?
- De quelle manière les organismes d’économie sociale contribuent-ils au financement de l’économie sociale?

***Création d’un modèle et recherche de procédés innovateurs de communication et de diffusion, traditionnels et électroniques***
- Comment les acteurs de l’économie sociale peuvent-ils communiquer entre eux le plus efficacement possible?
- Comment les membres du Partenariat peuvent-ils contribuer au développement et à la création de modèles de processus et de techniques?
- Que peut-on gagner à explorer la technologie en
tant qu’égalisateur des disparités par rapport à la technologie en tant qu’obstacle?
Subnodes – Sous-centres

These themes and questions are being explored through six sub-nodes (or research clusters), which coordinate research activity around one or more of the five themes of the Network, bridging to other sub-nodes through mechanisms such as overlapping members, steering committee meetings, workshops, newsletters, the internet, and dissemination events.

Ces questions et ces thèmes sont explorés dans six sous-centres (ou groupes de recherche) qui coordonnent les activités de recherche menées sur l’un ou plusieurs des cinq thèmes du Partenariat, assurant le rapprochement vers les autres sous-centres par le biais de mécanismes tels que des membres dont les activités chevauchent plusieurs sous-centres, des rencontres de comités directeurs, des ateliers, des bulletins, l’internet et des événements de diffusion.

Sub-node / Sous-centre 1 - Mapping and policy analysis / Cartographie et analyse des politiques
Coordinator / Coordinateur : Luc Thériault, Ph.D., Sociology, UNB

Sub-node / Sous-centre 2 - Mobilization - Inclusion & empowerment in the social economy
http://www.msvu.ca/socialeconomyatlantic/English/rc sn2 mobilization inclusion empowerment en.asp / Mobilisation - Inclusion et autonomisation dans l’économie sociale
Coordinator / Coordonnatrice : Irené Novaczek, Ph.D., Institute for Island Studies, UPEI

Sub-node / Sous-centre 3 - Mobilization - Food Security and CED
http://www.msvu.ca/socialeconomyatlantic/English/rc sn3 mobilization food security CED en.asp / Mobilisation - Sécurité alimentaire et DÉC
Coordinator / Coordonnatrice : Patty Williams, Ph.D., Applied Human Nutrition, MSVU

Sub-node / Sous-centre 4 - Mobilization for Natural Resources and Livelihoods / Mobilisation pour les ressources naturelles et moyens de subsistance
Coordinator / Coordinateur : Omer Chouinard, Ph.D., Sociologie, U de M

Sub-node / Sous-centre 5 - Financing & Measuring Performance in the social economy / Financement et mesure du rendement dans l’économie sociale
Coordinators / Coordonnatrices : Sonja Novkovic, Ph.D., Economics; Judy Haiven, Ph.D., Management, SMU

Sub-node / Sous-centre 6 - Communication Practices & Tools / Pratiques et outils de communication
http://www.msvu.ca/socialeconomyatlantic/English/rc sn6 communication practice tools en.asp
Coordinators / Coordonateurs : Mme. Penelope Rowe, Community Services Council of Newfoundland and Labrador; Ivan Emke, Ph.D., Social/Cultural Studies, Sir Wilfred Grenfell College, MUN
Current Atlantic Node Research Projects / Projets de recherche actuellement en cours au Centre de l’Atlantique

In the following pages you will find brief outlines of research projects completed or currently underway in the Network. Project information is presented in the language in which the research is being conducted. For a current list of partners, please see the back page of this document. In addition to the academic, community and government partners involved, there are many undergraduate and graduate students involved in the research projects and community partner organizations.

********

Dans les pages suivantes, vous trouverez de brèves descriptions des projets de recherche complétés ou en cours menés au sein du Partenariat. Les renseignements relatifs aux projets sont présentés dans la langue dans laquelle la recherche est entreprise. Pour une liste des partenaires actuels, veuillez consulter la dernière page de ce document. Outre les universitaires et les partenaires gouvernementaux et communautaires, de nombreux étudiants de premier cycle et de cycles supérieurs sont actifs dans les projets de recherche et au sein des organismes communautaires.
N.1 SE Library Project (MSVU Library Guide)

Research Partners - Partenaires de recherche
Meg Raven, MSVU Library, Halifax NS
Hilary Skov-Nielsen, MSVU Library, Halifax NS
Leslie Brown, Department of Sociology/Anthropology, MSVU, Halifax NS
Staff from MSVU and other Atlantic Node Sub-node institutions

Project Description - Description du projet
Work on the SES Research Network Guide to Resources to date has been completed by Meg Raven, Hilary Skov-Nielsen, Stan Orlov and Donna Bourne-Tyson, in conjunction with David Ryan, Julia Gabrini, and Sean Swanick - Dalhousie School of Information Studies graduate students.

The electronic LibGuides Social Economy subject guide was created by Meg Raven based on a printed pathfinder. Most parts of the guide, with the exception of MSVU specific materials (e.g. databases under license agreement) are available to any user. Further, each library in the SES Research Network is welcome to recreate the categories used by MSVU and develop their own SE Subject guide tailored to their institution’s needs. This guide is a useful reference and learning tool for students and scholars of the SE, whether in academia or outside of it. While oriented to MSVU users, the guide is accessible to anyone through Google. The tool provides a model that is adaptable to other university library systems. We anticipate that it will be linked through other sites such as the Hub and the national student network. It can be updated easily, and we will be able to respond to suggestions from users.

Outputs - Résultats
This tool is available on the MSVU website, the SES Network website, and adaptations of it will be available on other university libraries’ sites. The tool is searchable through google.ca While mainly intended as a research tool for people associated with academia, it is useful to any who want to find out about research on the social economy. Only the licensed materials are restricted in access. All other materials are available to any interested person.

N.2 Library Project II – D-Space site for SE Resources – Research Tool

Research Partners - Partenaires de recherche
M. Raven, Hillary Skov-Nielsen, S. Orlov, Roger Gillis and D. Bourne-Tyson, MSVU Library, Halifax NS
Leslie Brown, Department of Sociology/Anthropology, MSVU, Halifax NS
Other universities, in collaboration with community partners in the SES Network

Project Description - Description du projet
This is a research tool and knowledge dissemination tool. The D-Space Guide to Resources in the SE site will provide a repository for research on the SE conducted by anyone in the universities and community partners that are part of the SES Research Network, as well as other “grey” literature on the SE. It is designed to be a tool for anyone interested in research in the SE. The MSVU Library is working with Dr. Leslie Brown and the SES/ESD Network on the development of a comprehensive Guide to Resources on the social economy, focusing initially on Atlantic Canada. The project is scheduled for completion in 2010. Each partner library and member of the Social Economy Research Network will be able to link to the DSpace database behind the scenes to add content. All sites will be listed on DSpace as contributors and contributions can be made independently from their home institutions. This project ties in with other resource sharing initiatives that the Council of Atlantic University Libraries (CAUL) is undertaking as part of the Atlantic Scholarly Information Network (ASIN) initiative, and the Synergies initiative.

N.3 Mapping the Social Economy with Mi’kmaq communities

Research Partners - Partenaires de recherche
L. Jane McMillan, Department of Anthropology, St. FX, Antigonish NS
Leslie Brown, Department of Sociology/Anthropology, MSVU, Halifax NS
Kerry Prosper, Paq’tnkek First Nation, Afton NS

Project Description - Description du projet
This project mounted a one-day working seminar, Made with Mi’kmaq Hands, which took the form of a sharing circle and which took place at the community complex in Paq’tnkek First Nation. The sharing circle was a component of a larger project focused on exploring craft cooperative potential in Paq’tnkek First Nation. By consulting with community members regarding their ideas about creating and maintaining a craft cooperative, the forum took a participatory action research approach to developing networks in the local social economy. It also pulled together the SES/ESD network members who are doing research with Aboriginal communities as well as others not affiliated with the Network.

Outputs - Résultats
- Community Workshop/Sharing Circle, March 28, 2008
- Workshop “Made With Mi’kmaq Hands” was held March 28, 2008.
- Sharing Circle Proceedings - B. MacNeil, graduate RA
- Partner website developed: St. Francis Xavier University, Canada Research Chair (Indigenous Peoples and Sustainable Communities) - Social Economy

1.1 Survey of Co-ops and Credit Unions in Atlantic Canada

Research Partners - Partenaires de recherche
Luc Thériault, Department of Sociology, University of New Brunswick, Fredericton NB
Leslie Brown, Department of Sociology/Anthropology, Mount Saint Vincent University, Halifax NS
Ron Skibbens, Service Nova Scotia and Municipal Relations, Halifax NS

Project Description - Description du projet
As part of its large research program, the Social Economy and Sustainability Research Network decided in 2006 to prepare and conduct a survey of co-operatives and credit unions in all four provinces of Atlantic Canada. It was the felt that coherent and up-to-date information on the co-operative sector in the region was lacking and that such a project would make a significant and timely contribution to the “mapping” or “profiling” of the social economy.

Dr. Luc Thériault from the University of New Brunswick took the lead of this project with the help of other member of the research network and the technical assistance of survey research consultants from York University in Toronto. The survey was administered between April and October 2007 and yielded 296 usable responses from co-operatives and credit unions from across the region. This preliminary research report offers a first look at the information obtained by analyzing it overall and by breaking it down by language, provincial, and type of co-operatives. Other analyses on the data are possible, of course, and may be the subject of future publications.

Overall, 80% of organizations responded to the English version of our questionnaire and 20% responded to the French version. Financial co-operatives (credit unions and caisses populaires) account for about 21% percent of responding organizations, housing co-operatives account for about 13%, and the remaining 66% is composed of a wide variety of “other co-operatives”.

For all the responding co-operatives the average “age-in-business” is nearly 33 years. Generally, co-operatives are members of one or two federations or associations. The Nova Scotia Co-op Council and Co-op Atlantic in particular are among the dominant umbrella organizations for the sector in the region. Co-operatives in Atlantic Canada, in turn, have cumulatively well over half a million “members” but it must be remembered that some of these members are counted more than once as an individual can be a member in several co-operatives. Financial co-operatives tend to have the largest number of individual members.

Co-operatives in Atlantic Canada generally hold one AGM per year, plus at least one other meeting. The typical Board of Directors overseeing these organizations is composed of nine or seven members. The Board of Directors typically meets 10 times a year (modal value). In about 24% of co-operatives, Board Members receive some form of compensation for their participation on the board. The use of volunteers (aside from board members) is found in about 55% of responding organizations.

The financial picture of the co-operatives in Atlantic Canada is extremely diversified and thus difficult to summarize. Using the median values, we find that a “typical” co-operative in the region has revenues of about $437,000 and expenditures of around $343,000. But these figures are only aggregates and the ranges found for both revenues and expenditures are astounding.

The number of paid employees (defined here as those receiving T4 slips for income tax purposes) also varies widely between co-operatives as the mode is 0, the median value is 3, and the average is 23.6! More interestingly, we can say that the cumulative number of employees (part-time and full-time)
employed by the co-operatives responding to this survey is totaling over 6,800. This is not an insignificant number of jobs in the region!

Roughly between 40% and 60% of co-operatives are found to make voluntary contributions (the proportion varies with the type of contribution) to their local community. Collaborations with other co-operative (i.e., within the co-op sector) is perhaps not as extensive as we had expected (22% of co-operatives report doing “a lot” of it and 26% report none of it) and the potential barriers preventing collaborations remain to be explored. As for the organization’s internal capacity (for things like planning, administration and IT), it is among financial co-operatives that we find the greater amount of capacities.

The survey shows that the internationally acknowledged Co-operative Principles are relatively well known in the sector (two thirds of co-operatives say that they are aware or very aware of them) but the education of the public (as opposed to that of members) is probably one of the areas (with participation in public policy development) where responding organizations are the least likely to fully live by these principles.

Finally, reporting practices of organizations are now extending relatively frequently into the reporting of social impacts (39%) but still relatively rarely into the reporting of environmental impacts (18%).

The conclusion stresses the importance for governments to pay increasing attention to the activities of co-operatives and to institute policies and regulations that are adapted to and helpful for the co-operative sector in the region.

1.2 Atlantic Node Community Partners’ Profiles

Research Partners - Partenaires de recherche
Noreen Millar, Coordinator, Atlantic Node, Halifax NS
Megan MacDonald, Communications Assistant, Node office (2008-2010), Halifax NS
Community partner organizations from the Social Economy and Sustainability Research Network

Project Description - Description du projet
Following along the same lines as the BC Social Economy Roundtable’s A Social Economy Showcase: BC Stories, we will be creating profiles, with our community partner organizations, of our Network partners – a microcosm of the social economy in the Atlantic region. The profiles will be compiled into an informative booklet which will become a reference that describes all of the partners and how they relate to the social economy. This document will be useful to the partners themselves, as well as to government departments and other organizations within and outside of this region. Partner websites, their public reports and other resources, along with discussions with the partners, will be used to create this document.

1.3 Fishing for the Future II: Tracking the Coastal Communities Network from First Beginnings to Economic Sustainability

Research Partners - Partenaires de recherche
Paula Romanow, Education-Researcher, Mount Saint Vincent University, Halifax NS
Ishbel Munro, Coastal Communities Network, New Glasgow NS

Project Description - Description du projet
This project is a case study of the birth and evolution of an organization which fits squarely into the concept of the social economy. It is exploring the process that the Coastal Communities Network has undergone from its inception 15 years ago, through its ensuing history, to its current place as the largest rural advocacy group in Nova Scotia; it is also exploring models and best practices which will enable the CCN to shift from a strictly not-for-profit model towards one which will employ the idea of social entrepreneurship in an attempt to create economic viability and sustainability for itself in the future. The project takes its name from the conference which saw the birth of the CCN: the Fishing for the Future conference was held in February of 1992 in response to the collapse of the ground fishery. Although initially created to deal with the on-going crisis in coastal Nova Scotian communities, in the ensuing 15 years the CCN has grown to become the voice of rural and small town Nova Scotia as a whole. The CCN is now at another major crossroads in its evolution, and so the title looks to the future, as well as the past. Like most community-based organizations, the CCN is constantly having to find outside sources of operational funding to keep it going from one year to the next; further, it is dependent on project-based funding to allow it to undertake its many (and increasing) research and capacity-building activities. Currently, because of this “not-for-profit” funding model and all that it entails, the CCN does not have time to step back and examine where they’ve been and where they could go; it is forced by time and funding constraints into being reactive to crises instead of proactive to avert crises. Thus, the organization hopes to determine ways to develop sustainable revenue streams to allow it to become less dependent on outside funding. This in turn will allow it to be able to create long-range planning and goals, as well as remove the time-consuming task of constantly having to be looking for funding sources, time better spent in doing what it is mandated to do. Thus, the CCN’s goal for this research is to allow it to articulate and then learn from, the process through which it has grown into today’s organization, and further, to explore best practices and models of social entrepreneurship which it could adopt, allowing it to move forward towards economic sustainability.

1.4 Les politiques gouvernementales comme support aux organismes communautaires de gestion viable des groupes de bassins versants : analyses des politiques et recommandations

Research Partners - Partenaires de recherche
Omer Chouinard, Department of Sociology, Université de Moncton, Campus de Moncton, N-B
Gilles Martin, Environmental Studies, Université de Moncton, N-B
André Leclerc, Université de Moncton, Edmundston N-B
Jocelyn Gauvin, Groupe de développement durable du Pays de Cocagne, N-B

Project Description - Description du projet
L'étude proposée veut examiner comment les groupes et organisations communautaires de l'économie sociale œuvrant dans les secteurs du développement durable, principalement sur la gestion de l'eau, peuvent être renforcés par des politiques adéquates dans les différentes provinces de l'Atlantique. L'étude ciblera les groupes de bassins versants, les groupes PALA (Plan d'assainissement du littoral atlantique) et la Coalition pour la viabilité du sud du golfe du Saint-Laurent. Plus précisément, l'étude a :
- évalué les modes de financement de groupes communautaires, coopératifs et/ou d'économie sociale du sud-est du Nouveau-Brunswick;
- fait l'examen des politiques (programmes, services, mécanismes de financement) provinciaux et fédéraux touchant le fonctionnement des groupes ciblés;
- à la lumière de l'analyse effectuée, elle a établi des recommandations au niveau des politiques qui pourraient favoriser la viabilité des groupes cibles.

Outputs - Résultats
- Production d'un article qui sera soumis à la revue Économie et Solidarité ou Nouvelles Pratiques Sociales. Mars 2009.
- Rédaction d'un rapport de recherche qui mettra l'emphasis sur les recommandations et qui sera distribué auprès des groupes communautaires du secteur environnemental et auprès des instances gouvernementales concernées dont les Ministère de l'Environnement, des Gouvernements locaux et des Ressources Naturelles du Nouveau-Brunswick. Mars 2009
- Sites Web. Le rapport de recherche et l'article seront disponibles en ligne sur le réseau de l'ÉS, sur le réseau canadien de l'ÉS, et sur les sites Web des différents groupes participants
- Poster, Réseau Économie sociale et durabilité au Canada Atlantique, Mobilizing Knowledge and Action: Social Economy Research in Atlantic Canada, Terre-Neuve. 17 au 19 octobre 2008
- Activité de validation auprès des associations de bassin versant participantes. 19 janvier 2009

1.5 Profil de l’ancienne et de la nouvelle économie sociale dans le développement territorial des Îles acadiennes (Lamèque et Miscou)

Research Partners - Partenaires de recherche
Omer Chouinard and Maurice Beaudin, Université de Moncton, Moncton, N-B
André Leclerc, Chaire des caisses populaires acadiennes en gestion des coopératives, N-B
Melvin Doiron, Coopérative de développement régional – Acadie N-B
Paul Lanteigne, Magasin Co-op, N-B
Pricette Dovonou-Vinagbé (Étudiante) Université de Moncton, campus de Moncton, N-B

Project Description - Description du projet
Le territoire des Îles acadiennes regroupe deux îles (Lamèque et Miscou) situées dans la pointe nord-est de la péninsule acadienne. Sur le plan de la gouvernance locale, ce territoire est composé de deux municipalités et de dix districts de services locaux (DSL). Des 6948 habitants des Îles, 65 % vivaient dans les DSL. Ces Îles sont unies à la province du Nouveau-Brunswick depuis près de 50 ans à Lamèque et 10 ans à Miscou. C’est dans les années 30 et 40 que l’Association coopérative des pêcheurs prend forme dans le but de faire la transformation et la commercialisation du poisson. Dans cette fouleée se sont développées la coopérative financière et la coopérative de consommation qui actuellement forment les piliers de l’économie sociale de ce territoire d’étude du profil de l’économie sociale. Cependant, à ces activités des piliers de la coopération que nous qualifions d’ancienne économie sociale viennent se greffer diverses activités sociales et économiques qui ont pour but de renforcer le lien social par des retombées dans l’ensemble de la collectivité insulaire. Ces dernières activités qui se préoccupent davantage des liens entre les personnes sont qualifiées de nouvelle économie sociale.

La formation continue et l’expérience inter coopérative dans ce profil de l’impact de l’économie sociale dont bénéficient ou que favorisent les organismes membres de l’ancienne économie sociale contribuent à favoriser l’émergence de leaders d’entreprises de solidarité et d’une relève sur le plan collectif pour une meilleure prise en charge du milieu. Or, la présente proposition sert à outiller ces derniers puisqu’elle prévoit offrir un retour d’image favorisant une plus grande fierté face aux accomplissements collectifs ainsi que la pleine conscience du potentiel que représentent les effectifs coopératifs en place pour un développement accru utilisant la formule de l’économie sociale.

1.6 Policies that Support Bridging, Bonding and Building between Government and the Social Economy in Atlantic Canada

Research Partners - Partenaires de recherche
Jan Myers, Cardiff Institute for Co-operative Studies, University of Wales Institute, Cardiff UK
Chase McGrath, Dalhousie University (Graduate RA)
Atlantic Node Policy Scan Working Group (SN1)

Project Description - Description du projet
Preliminary stage of an Atlantic-wide public policy scan and policy evaluation: to conduct an inventory of federal and provincial legislation, policies, programs and initiatives that are directly relevant to community economic and social development, the social economy and building the capacity and opportunities for engagement in policy formulation and implementation in the Atlantic region. This work aims to document and analyze the impacts for non-profit organizations and co-operative enterprises of government policies in the Atlantic region and to draw on current research and dialogue both in the region and in Canada.

1.7 SES Research Network Policy Threads Inventory and Analysis

Research Partners - Partenaires de recherche
Dr. Martha MacDonald, Saint Mary’s University, Halifax, NS
Dr. Luc Thériault, Department of Sociology, University of New Brunswick, NB
Dr. Leslie Brown, Department of Sociology/Anthropology, Mount Saint Vincent University, Halifax NS
Graduate Research Student

Project Description - Description du projet
The general aim of the ‘Policy Threads’ project is to help clarify policy issues relating to the social economy in the Atlantic region, based on work already done by researchers who are members of the SES Research Network. Under the supervision of Dr. MacDonald (in consultation with Dr. Luc Thériault and Dr. Leslie Brown) Graeme will do an exhaustive documentary analysis of every official project of the SES Network, with the aim of pulling-out, summarizing and thematically organizing/analyzing the policy findings, implications or recommendations found in these projects. As part of his research, Graeme will conduct a series of short telephone, email or face-to-face conversations with a selected number of project leaders identified during the documentary analysis phase of the project. This will be ongoing over the summer of 2009.

The final product of the ‘Policy Threads’ project will take the form of both an inventory and an overview paper on themes and issues that will accompany the inventory. Such a paper would be subject to review by any researchers whose work is mentioned. Our project is not meant to conflict with or preempt the policy work done by the individual projects and nodes, rather to support a policy focus and provide a baseline as we move forward. The products of this project will be primarily internal, but plans are to present a draft of the paper at the Policy Colloquium in October 2009.

Outputs - Résultats

1.8 Cultural Co-operatives in Atlantic Canada: Progress and Governance

Research Partners - Partenaires de recherche
Dr L. Haiven, Dr J. Haiven, Saint Mary’s University, Halifax, NS
P. Mowat, Deep Roots Music Co-operative

Project Description - Description du projet
In Atlantic Canada, cultural co-operatives play an important role in fostering artistic talent, disseminating cultural workers and obtaining a fair market price for arts and handicrafts otherwise exploited. Looking at a range of cultural co-operatives, including theatre, filmmaking, handicraft and music co-operatives, this research will focus on several issues. For example: why cultural organisation adopted a cooperative model of governance; how the co-operative is governed; the advantages and disadvantages of the co-op form in order to develop individual artistic careers of their members, and relations between co-operatives.

2.1 Launching rural women’s entrepreneurship

Research Partners - Partenaires de recherche
Wendy Pobjoy, LEAP Co-op (Launching Entrepreneurial Advantage for Parents), PEI
Marie Burge, Cooper Institute, PEI
Godfrey Baldacchino, Canada Research Chair in Island Studies, Charlottetown UPEI
Irené Novaczek, Institute of Island Studies, Charlottetown UPEI
Darleen Gallant, LEAP Co-op (Launching Entrepreneurial Advantage for Parents), PEI

Project Description - Description du projet
- Support an existing co-op in pursuing its research goals
- Process documentation
- Participatory evaluation
- Case study on women in rural development

We are rural mothers of young children striving for economic self-sufficiency and development of community. The successful establishment of the LEAP co-operative will serve as a model for bottom-up growth of the social economy, by demonstrating the value of nurturing capacity for small-scale, local, community-driven economic and social development projects. We, the LEAP Co-operative, are a newly incorporated group, largely composed of mothers of young children. We are seeking to create co-operative employment for ourselves and to extend the opportunity to others once the venture has become self-sustaining. We are working on product development and business planning. Our intention is to create and market appliquéd wall hangings.

The research question concerns the challenges and resources that affect the possibility of success for economic development conceived and managed by those at whom it is directed, especially when the target group is rural, female, with dependent children, and facing multiple barriers to profitable, sustainable and meaningful employment.

2.2 Community Accounts – PEI

Research Partners - Partenaires de recherche
Irené Novacek, Institute of Island Studies, UPEI, Charlottetown PEI
Rob Sharkie, Trout River Environment Committee, PEI
Tyne Valley Municipality, PEI
Lennox Island First Nation, PEI
Community Accounts of Newfoundland and Labrador
Stacey Enman (student) University of Prince Edward Island
Dolores LeVangie (student), UPEI
Quality of Island Life Cooperative

Project Description - Description du projet

- Define factors contributing to quality of life
- Develop PEI CA pilot
- Integrate community values into online CA database for local governance and research
- Develop infrastructural supports for the SE and concrete recommendations for government regarding instituting community accounts
- Foster learning from NL

Community Accounts are innovative user friendly information systems providing reliable statistics on social, economic and environmental matters. Community Accounts Data are organized into a system of accounts that allows users to find relationships between the data sets. The way the data is related forms a knowledge base that allows for informed decision making in the public and private sector and at all levels from small municipalities to urban centres. The researcher will be collecting primary data regarding quality of life as it is experienced by individuals living in the Lot 13 and Lennox Island area, with 10% of the population being included. The research question is: what are the components of well being and quality of life in the communities under study and how closely linked are the factors to the conventional socio-economic and environmental indicators used by governments to assess programs. The project outcome is to create community accounts that are accessible and easy to understand, providing communities with a greater understanding of what contributes to their well-being and how to manage wellbeing within the context of the current socio-political climate. Community Accounts allow communities to know exactly what is going on and encourage greater responsibility and self determination.

2.3 Youth Engagement in Hillsborough Park (Global Culture, Local Meanings and Contested Community): Redefining Youth Apathy

Research Partners - Partenaires de recherche
Jim Clow and Miriam Burchell (volunteer), Hillsborough Promoters, Charlottetown PEI
Mike Sirois, Coordinator of Youth Program, Hillsborough Helping Hands youth group, Charlottetown PEI
Marie Burge (summer program), Cooper Institute, PEI
Jean Mitchell, Sociology & Anthropology, UPEI, Charlottetown PEI
Students: Dolores LeVangie, Katie Harris, Heather Gushue, UPEI, Charlottetown PEI

Project Description - Description du projet
This project is the second phase of a three-phase research project whose aim is to contextualize the life experiences of young people in the community of Hillsborough Park, Prince Edward Island. Therefore, it builds on work that was undertaken in Phase One, entitled “Youth and Community Mobilization in Hillsborough Park, Charlottetown, Prince Edward Island”. A major need that was identified by the young people of the community during this phase was positive activities for them to participate in within their own community. A second major need identified in phase one was the development of positive relationships between young people with older members of their community as well as municipal authorities. The major aims of this Phase 2 project are to address these two major needs and also, to continue to examine the way youth were and are conceptualized (by themselves and the older generations) both within the community and beyond.

The significance of this project is in allowing researchers a venue to directly target young people between 14-18 years of age and also providing an opportunity for researchers and community members alike to help organize activities that support educational, physical, expressive and emotional development at the individual and collective levels. It is hoped that these activities will build a social support network that will offset some of the significant issues youth face as a result of poverty, family stress and lack of support and services. A further intention is specifically, to organize an effective and inclusive program for youth in the community and to provide community leadership training.

2.4 Advocating Changes to Maternity & Parental Benefits Legislation

Research Partners - Partenaires de recherche
Colleen MacQuarrie, Department of Psychology, University of Prince Edward Island, Charlottetown PEI
Sarah Roach-Lewis, Women for Environmental Sustainability, PEI
Jane Ledwell, PEI Status of Women
Women’s Network, PEI

Project Description - Description du projet
This initiative will address the issue of women’s economic autonomy. It will build on our original research of the current parental benefits legislation and our extensive consultation process. In this initiative, we will use our final recommendations to advocate for public policy change. Phase I of the initiative examined the broad implications and the equitability of the new parental benefits legislation. Phase II took the research findings and analysis and used them as the basis of developing policy options and recommendations towards a more equitable system and conducted extensive consultations. In the first two phases, we did gender analysis and looked beyond the surface to understand the inequities of the legislation. As we continue our work, the focus will shift to influencing the content of public policy.

Through this initiative, the short term objective of the Women’s Program that will be addressed directly is, “organization members and women affected by the issue understand the issue and are mobilized to engage in the public policy process.” The Intermediate Outcomes will be, “governments and publicly elected bodies understand and are engaged in addressing the issues” and “women participate in public policy decision-making processes.” The projected long-term outcome will be, “government and publicly elected bodies have integrated the diversity of women’s perspectives in public policies.”

2.5 The Role of Women in the Fishery and Fisheries Management

Research Partners - Partenaires de recherche
Women for Environmental Sustainability, PEI
Irené Novaczek, Institute of Island Studies, UPEI, Charlottetown PEI
Jean Mitchell, Sociology & Anthropology, UPEI, Charlottetown PEI

Project Description - Description du projet
The purpose of this research project is to investigate the role women play in the PEI fishery and its management. There is an identified need to understand the role of women in the fishing enterprise as an important aspect of policy development. The research will look at these questions: what is the role of women in fishing enterprises and the social economy organizations linked to the fishery (including fishermen's associations) on PEI? What are the opportunities and hurdles for the inclusion of women in fisheries management decision making processes and structures? This research project will provide a greater awareness of women’s contribution to the fishery. It will identify the barriers women face in becoming involved in fisheries management through their participation in social economy organizations, and will provide recommendations for changes in fisheries management processes so they are more gender inclusive. The research project will strengthen the social capital of women in fishing communities and will strengthen the social economy organizations working in the fisheries economic sector by encouraging them to be more inclusive. Interviews, transcription, analysis and report writing were completed in February 2009. Dissemination began in March 2009 with two community workshops in rural fishing communities on PEI to validate the research.

2.6 Mapping Supports for the Social Economy

Research Partners - Partenaires de recherche
Irené Novaczek, Institute of Island Studies, University of Prince Edward Island, Charlottetown PEI
Janice Pettit, Government of Prince Edward Island, PEI
Sub-node 2 partners
Students: Katie Harris and Barbara Groome Wynne, UPEI

Project Description - Description du projet
The intent of the project is to measure the extent and impacts of changes to federal and provincial government supports for social economy organizations on Prince Edward Island. The research project will provide a greater awareness of these supports by identifying changes in available of funding as well as changes in policy at the federal and provincial levels that have an impact on local social economy organizations and their work.

The research questions this project will ask are: what federal and provincial funding programs exist to support social economy organizations on PEI, and especially for those involved in empowerment and inclusion of marginalized members of society? What changes have occurred in the level of federal and provincial supports and what have been the effects of these changes on PEI’s social economy?

2.7(a) Indigenous Community Development: Phase I – Ethnobotany

Research Partners - Partenaires de recherche
Irené Novacek, Institute of Island Studies, University of Prince Edward Island, Charlottetown PEI
Randy Angus, MCPEI (Mi’kmaq Confederacy of PEI)
Dolores LeVangie (intern), UPEI
International partners (Chile): Chiloe Bosque Modelo; Williche Council of Chiefs, ARCIS University

Project Description - Description du projet
Issues of inclusion and empowerment are critical to the economic development and cultural survival of aboriginal peoples. Reclaiming and protecting indigenous ecological knowledge is an important exercise to provide the basis for a community’s social and economic development. This project will explore the traditional uses of seaweed by the Mi’kmaq of PEI and the Williche of Chiloe, Chile. The aims of this research are, to contribute to the programs of two social economy organizations whose goals include economic diversification, and cultural survival of marginalized indigenous communities on PEI and Chile. The means are through 1) documenting community development opportunities based on cataloguing knowledge on indigenous knowledge of marine plants 2) increasing understanding between Mi’kmaq and Williche peoples, as a first stage in development of further projects.

Project Description - Description du projet
This project researched micro enterprise as a vessel for empowerment and inclusion of marginalized people with regard to economic development and cultural survival. Micro enterprise is increasingly important, especially for those who are of low income or who inhabit marginalized sectors of society. The research aims to develop an information base that improves understanding of micro enterprise as a strategy to empower certain people in society, for example, people who live on an Island or who reside in rural areas. The research however, will also seek to make information pertinent to more specific groups of marginalized people in society, such as aboriginal people, e.g. the Williche and Mi’kmaq, landed immigrants, and rural women.

The goals of this research are to contribute to the programs of partnering social economy organizations in PEI and Chiloe whose goals include economic diversification and cultural survival of marginalized and indigenous communities. The means are through: 1) documentation of opportunities for community development via further research of potential product development based on indigenous knowledge of marine plants 2) research into the benefits and challenges of various micro enterprise models to identify those most suited for marginalized people in rural and island contexts. 3) To provide inspiration and practical advice to Social Economy organizations that support CED (community economic development) to marginalized people on small islands.

2.7(c) Indigenous Community Development: Phase III – Youth Engagement with Community and Natural Resources

Research Partners - Partenaires de recherche
Irené Novaczek, Institute of Island Studies, UPEI, Charlottetown PEI
Abigail Franco Institute of Island Studies, UPEI
Hillsborough Promoters
Randy Angus, Mi’kmaq Confederacy of PEI
International partners (Chile): Williche Council of Chiefs, ARCIS University

Projection Description
The main research question for this project is: how can youth be engaged, included and empowered in their community with a focus on sustainable resource management?

The goals of this project are to foster youth engagement with the natural resources that are found around them, while also promoting an awareness of the relationships between such resources and their communities at large. Through research and work with community partners an understanding of an appropriate approach to youth engagement will be developed for small islands and indigenous communities. A key objective of this project is to empower Williche and Mi’kmaq youth through participatory action research that builds their self confidence; documents their needs and aspirations with respect to fisheries and aquaculture; and helps them find a place in the community development process. The focus of this project is to encourage and promote a healthy and educational relationship between youth and their environment, with an added element of cross-cultural documentation and sharing of knowledge and experience.

2.8 PEI Organic Farmer-Citizen Co-operative

Research Partners - Partenaires de recherche
Gary Clausheide, Jane MacNeil, PEI Growing Circle Organic Food Co-op
Pamela Courtenay-Hall, Philosophy, UPEI
Marie Burge, Cooper Institute, PEI

Project Description - Description du projet
Small-scale agriculture is disappearing because our current economic system with its low commodity prices cannot provide a sustainable income for small farms. Yet many people on PEI want to support small-scale farming, want to have regular access to locally-grown, organic, fair-trade food, and they don’t want to see the Island’s unique pastoral landscape converted into massive industrialized farms. The research question is: how can a farmer-citizen co-operative be developed in ways that address the problems of: small-scale (family) farm attrition, the centralization of farming, the global corporatization of food supply, and consequent environmental degradation and energy waste.

This program hopes to develop an alliance between the Island’s small-scale growers and the consumers here who want a more adequate organic and local food supply. Goals of this project are premised upon 1) providing food for local needs first, and exporting whatever is surplus 2) ensuring that farmers get a fair price for the food they grow. And they include co-operation and mutual support between farmers and citizens to meet the needs of both groups, including collaborative planning of crops, processing and marketing 3) a store in Charlottetown open to the public 5 or 6 days a week that would contain space for fresh locally produced organic vegetables and fruit, and it would have processing facilities to turn bumper crops into canned and frozen produce. This store would also serve important social and educational functions: it would be a site for people to learn how to preserve food or cook from farm-fresh produce; a place where farmers and consumers come together to discuss problems and projects in agriculture; a place where people come to meet and talk and enjoy the talents of local musicians and artists.

2.10 Access of Adults with Learning Disabilities to Post-secondary Education

Research Partners - Partenaires de recherche
Julia Wright, Marilyn Balderston, Learning Disabilities Association of PEI
Carla DiGiorgio, Faculty of Education UPEI, Charlottetown PEI
Joanne McCabe, Student Accessibility Services, UPEI, Charlottetown PEI

Project Description - Description du projet
This research aims to identify the barriers facing adult learners with learning difficulties in post-secondary and basic education settings, and will also aim to identify solutions to these barriers, through examination of current and potential strategies to improve accessibility and teaching to these students. This study will be completed in four stages: interviews, literature review, workshop development and delivery to students and instructors, and analysis of results and dissemination of stakeholder and other groups. This research will help to analyze the experiences of adults with learning disabilities in PEI in accessing higher education. This information will allow practitioners and researchers to better understand the challenges and successes that these students face, in order to make higher education more accessible for students in future.

2.18 Quality of Life and Environmental Awareness Survey

Research Partners - Partenaires de recherche
Irené Novaczek, Institute of Island Studies, University of Prince Edward Island, Charlottetown PEI
Rob Sharkie, Trout River Environmental Committee, PEI
Katherine Clough, Quality of Island Life Co-operative, PEI
Student: Dolores LeVangie, UPEI

Project Description - Description du projet
The Trout River Environmental Committee Inc. wishes to complete a survey designed to gather information about watershed residents’ perceptions of quality of life within the watershed, the level of environmental awareness in individuals, and the individual’s awareness of the connection between quality of life and environmental health.

To do this, TREC would like to partner with the Institute of Island Studies and the Quality of Island Life Co-op to complete a project similar in scope and scale to the recent Tyne Valley and Lennox Island studies (SN 2.2). This project would be specifically designed to dovetail with these previous projects, would contribute to the larger overall goal of contributing to the development of a Community Accounts project in PEI, and would aid TREC and watershed residents alike by enabling better watershed planning at the community level.

3.1 Food Box Program: Current and Potential Contributions to the Social Economy

Research Partners - Partenaires de recherche
Patty Williams, Applied Human Nutrition, MSVU, Halifax NS
Debra Reimer, Kids Action Program, Kentville NS
Sub-node 3 Steering Committee

Project Description - Description du projet
The Kid’s Action Program’s (KAP) Food Box program assists pre and post-natal women facing barriers such as low income who are eligible for the Great Beginnings Canada Prenatal Nutrition Program (CPNP) in Hants and Kings Counties. Over the past 12 years a subsidized Food Box has been available for purchase by CPNP participants each month serving aiming to supplement their existing food budgets, model healthy, local food choices and distribute nutrition, child development, pre-natal and parenting information, as well as to support local producers and suppliers as much as possible. While evaluations of the Great Beginnings CPNP program have taken place, the food box program and its contributions and potential contributions to the social economy has not, and published research examining the benefits and challenges of similar models is quite limited. This project is evaluating the KAP Food Box program’s contributions and potential contributions to the social economy including benefits and challenges from the perspective of other vulnerable groups that might benefit from access to the program, and suppliers and producers who might support the program.

Outputs - Résultats
- A literature review examining different food box program models
- Presentation of preliminary findings as part of Community Forum on Food Security and the Social Economy
- Sep. 2008 Poster: Current and Potential Contributions to the Social Economy

Joanne Llewellyn, Public Health Nutritionist, Annapolis Valley Health
Patty Williams, Applied Human Nutrition, MSVU, Halifax NS

Project Description - Description du projet
Background: The Forum on community food security (CFS) and the social economy was hosted by Sub Node Three (SN3): Community Mobilization around Food Security and Community Economic Development, on November 7th, 2007 in Greenwich, NS. Sub Node Three aims to facilitate participatory action research on mobilization projects around food security and community economic development that: are driven, guided and approved by SN3 community partners; involve an element of university-community collaboration; contribute to building food security at multiple levels and with diverse groups; benefit the social economy in Hants, Kings and Annapolis Counties; and have relevance to/impacts on the wider social economy.

Purpose: The purpose of the forum was to bring together local politicians, farmers, representatives from local organizations, researchers, students, public health staff and community members already involved or with an interest in becoming involved in community food security and food systems in the Annapolis, Kings and Hants Counties to: clarify the relationship between community food security (CFS) and the social economy; gain an in depth understanding of CFS and how different groups are involved in our local area; obtain a shared understanding of the barriers to creating a food secure community; identify the resources and facilitate dialogue around opportunities to building CFS; discuss and create action to help support a food security in our local community; explore how the Social Economy and Sustainability Network can support community mobilization on food security and the social economy in Kings, Hants, & Annapolis Counties.

Outcomes: Introductory presentations on What is Food Security? The Social Economy?; Food Security and the Social Economy in Nova Scotia; and Introduction to A Continuum of Food Security Strategies, opened the day. These presentations were followed by a series of 10 minute, powerful presentations that provided examples of capacity building strategies being used in the target area. These included presentations on the Kids Action Program, Food Box Research, School and Youth Gardening, A Day in the Life of FEED NOVA SCOTIA (Video), SunRoot Farm Community Shared Agriculture, Wolfville as a Fair Trade Town, Nova Scotia Food Security Network and the Ecology Action Center’s Food Miles Project. In small groups participants were ask to discuss what opportunities they saw, and barriers they could foresee to addressing food security in Hants, Kings and Annapolis Counties. Four priority themes for future research projects identified at Community Forum to be undertaken by SN3 were: Education: Children; Public Awareness; Food Box Program: Expansion; Schools Groups: Building Partnerships; and...
Agricultural Community and Non-Profit Organizations: Increasing Opportunities for Dialogue. Participants then undertook action planning in small groups to discuss: What actions need to happen to move this opportunity forward? Who will make sure that each action happens? Who should participate in the action? What is the first next step that needs to happen after today and who will take responsibility for making it happen? Actions plans were shared with the whole group, and proceedings of the days were sent to all forum participants and several people who had indicated interested but were not available to attend the forum. Call for proposals sent to all forum attendees and food security and SE networks in April 2008. Funding awarded for 3 projects in May- July, 2008.

3.3 Mobilization around Food Security within the Canadian Social Economy Research Partnerships: A National Scan

Research Partners - Partenaires de recherche
Patty Williams-Applied Human Nutrition, and Leslie Brown-Sociology & Social Anthropology, MSVU, Halifax NS
Debra Reimer, Kids Action Program
Annie McKitrick, Coordinator, Canadian Social Economy Hub, University of Victoria, Victoria BC
Student: Liesel Carlsson, Dietetic Intern, MSVU, Halifax NS
Noreen Millar, Coordinator, Atlantic Node, Social Economy and Sustainability Research Network, Halifax, NS

Project Description - Description du projet
Purpose: The purpose of the national scan of food security research within the Canadian Social Economy Research Partnerships (CSERP) was to fuel discussions within the SES/ESD Network and SN3 around potential collaborations and future research, identify gaps in the food security research fabric on a national level, and to initiate cooperation among CSERP regional nodes to synthesize food security-related results.

Methods: The scan was conducted from July 2007 to May 2008 and included a review of the CSERP tele-learning session on food security and the social economy, CSERP regional Node and Hub websites, and interviews with Node/Hub coordinators and those responsible for food security projects.

Results: Results were analyzed using McCullum’s three stage continuum of Community Food Security (CFS) strategies as a framework, and to demonstrate how projects across the country are working on short, medium and long term initiatives to build food security. Many projects are working across the continuum, bridging stages. Opportunities for collaboration and future research are identified in the report.

3.4 Identification of Barriers and Tools to Support Community Mobilization and Action on Sustainable Food Purchasing Decisions

Research Partners - Partenaires de recherche
Alan Warner, School of Recreation Management, Acadia University, Wolfville NS
Edith Gallagher, Arthur Irving Academy for the Environment, K.C. Irving Environmental Science Centre, Acadia University
Student: Cate Trueman, Acadia University
Satya Ramen, (community partner) Just Us! Education and Development Society, Wolfville NS

Project Description - Description du projet
Consumers are increasingly interested in using their values and ethical principles in making food purchasing decisions, wanting to know where and under what conditions their food is produced. The interest of consumers in these issues and their willingness to shop accordingly will support agricultural production and food distribution systems that are sustainable. Sustainable food systems represent one element of community food security, including community access to food that produced, procured and distributed in ways that are environmentally sound and socially just.

Research indicates that there is a large gap between individuals’ interest in using their ethical principles in food purchasing decisions and the extent to which they actually do so. Yet to improve food security, consumers must translate positive attitudes into action and community stakeholders must develop the capacity to support the shift.

JUDES and Acadia University have partnered to address the barriers individuals experience when trying to use their ethical principles in decision-making through a literature review, focus group research, and educational tool design and evaluation to answer the following questions:

1. What are the barriers that different consumers experience in making sustainable food purchasing decisions?
2. What strategies, educational tools and systemic changes would be most helpful in reducing these barriers and increasing the number of consumers who translate their positive attitudes into purchases?
3. How are community organizations and stakeholders best engaged in the educational process to promote sustainable food choices and improve their capacity in this area?
4. What are promising systemic changes that can occur at a community level which can promote sustainable and secure food choices?

3.5 Making Healthy, Local Food Possible: Rural Community Solutions

Research Partners - Partenaires de recherche
Debra Reimer, Kids Action Program, Kentville, NS
T. Caldwell, Acadia University, Wolfville, NS
Student: Joanne Llewellyn, Masters

Project Description - Description du projet
This project aimed to address individual, household and community food insecurity by increasing the amount of fresh produce available to families. We did this in three ways: through creating individual family gardens, through building a garden at Apple Tree Landing Family Education Centre and through creating an outreach garden. Gardening education, tools and mentoring was an integral part of the project; it is our belief that this has built capacity to sustain access to fresh, healthy food into the future.

The purpose of this project was to foster supportive and sustainable community food networks in rural Kings and Hants Counties that begin to meet the needs of traditionally marginalized families; specifically families meeting the mandate of the Kids Action Program (KAP).

This project addressed issues related to food insecurity in a very concrete way. Families were supported to plant and grow food and were provided with the tools and resources necessary to continue to plant gardens in the future. Experiencing success over this past year has increased the likelihood of future gardening thus contributing to a sustainable food source for those involved. We will be following up with the families who were provided with containers for their back yards to offer support during the upcoming growing season further increasing the probability of the families continuing to garden.

Project Description - Description du projet

Background:
The Forum on community food security (CFS) and the social economy was hosted by Sub Node Three (SN3): Community Mobilization around Food Security and Community Economic Development, on March 23 & 24th 2010 in Greenwich N.S. Sub Node Three (SN3) aims to facilitate participatory action research on mobilization projects around food security and community economic development that are driven, guided and approved by SN3 community partners; involve an element of university - community collaboration; contribute to building food security at multiple levels and with diverse groups; benefit the social economy in Hants, Kings and Annapolis Counties; and have relevance to/impacts on the wider social economy.

Purpose:
The purpose of the March 2010 forum was to follow up on the 2007 forum by bringing together local politicians, farmers, representatives from local organizations, researchers, students, public health staff and community members to further explore what community food security looks like in Annapolis, Kings and Hants Countries. Projects funded and developed after the November 2007 forum as well as other innovative projects in the area were presented. Further, future plans for continuing action on community food security were made.

Outcomes:
As an introduction to the forum, Noreen Millar welcomed participants on behalf of The Atlantic Social Economy and Sustainability (SES) Research Network and shared information about the background and structure of the SES Network and its sub nodes. This was followed by an icebreaker to help give participants a sense of the diversity in the room and then an exercise to ensure all participants were working with common definitions of “food security” and “social economy” for the purpose of the forum. Then participants organized into smaller tables to discuss food security initiatives and projects they had been working on. Projects discussed included: School Garden Project, Family Matters, Strive for Five at School Program, Gaspereau School Garden, Community Shared Agriculture and projects of Kids Action Program including rural gardening, participatory food costing Food Box programs and many more.

Next, the 2007 forum was reviewed, including its outcomes and a brief discussion on what stood out from the previous forum. This was followed by presentations from the three projects that had been funded by SN3 since the 2007 forum. Liesel Carlsson presented her thesis on the school garden case study. This was followed by Edith Callaghan and Alan Warner presenting “Great Meals for a Change”.
The presentations ended with “Making Healthy, Local Food Possible: Rural Community Solutions”, an innovative, capacity building gardening project of Kids Action Program.

Day 2 started with a visioning exercise for the day, followed by informal conversation about other innovative projects in the area. Some of the initiatives discussed included: Valley Vegetarians, Bridgewater Community Christmas Dinner, demo booths and Wolfeville farmer’s market, Strive for Five, Fair Trade for Youth, and the Food Policy Council. Patty Williams then gave a brief overview and led a discussion regarding some provincial level initiatives including the Healthy Eating Nova Scotia strategy, the Nova Scotia Food Security Network, the Participatory Food Costing and Activating Policy Change for Community Food Security Community University Research Alliance (CURA), and the NS Food Policy Council to help make the links to broader capacity building and social systems change initiatives. Next, participants broke into smaller World Cafe Sessions to discuss what can be done to advance food security in the region.

After lunch, participants engaged in a discussion about developing action plans to impact local food security. Possibilities for action plans included:

- Developing income supports for people living with food insecurity. This includes increasing awareness of models already in use.
- Developing purchasing or procurement policies regarding food distribution. This requires government support and infrastructure, for example, to support transportation fresh local produce to Nova Scotia schools.
- Bringing small farms and farmers together to discuss food security and social justice.
- Sharing the food security message. This includes a personal commitment from forum participants to spread the message and promote food security websites such as Thought about Food? (www.foodthoughful.ca)
- Increasing availability of local products in stores. This would involve making stores accountable to provide local products. Mapping local food sources may be one way to solve distribution problems.
- Developing a “Pesto Manifesto” was also discussed. This is a communiqué to the government which would express concerns about food security. Supporters, such as forum participants would sign the document.

Currently, discussion is still in progress about how to follow up on some of these action plans.

4.1 Économie sociale et groupes de bassin versant sur le littoral acadien

Research Partners - Partenaires de recherche
Omer Chouinard, Maurice Beaudin, et Pierre-Marcel Desjardins, Université de Moncton (Campus de Moncton)
Patrick Émond et Frédéric Paillard, Groupe de bassin versant de Cap-Pelé
Jocelyne Gauvin, Groupe de développement durable de Cocagne, N-B
Nadine Gauvin, La Coalition pour la viabilité du sud du Golfe du Saint-Laurent, N-B
G. Martin, Université de Moncton, Campus de Moncton

Project Description - Description du projet

Résumé des phases 1 et 2 :
Ce projet de recherche veut identifier la contribution des associations de bassin versant à l’économie sociale et exige la mise en proximité des chercheurs et des milieux communautaires de façon à combiner leurs savoirs, leurs méthodes et leurs ressources. Ceci permet l’amélioration de la recherche et rend légitime le rôle des chercheurs dans les interventions auprès des organismes et des entreprises d’économie sociale. Ce renforcement du lien entre les divers groupes, agences, gouvernements et entreprises privées ou collectives contribue au succès des projets entrepris par les associations de bassin versant. Ainsi, ces organismes de bassin versant qui œuvrent dans les différentes communautés du littoral acadien du Nouveau-Brunswick mettent en œuvre la notion de réciprocité dans la mesure où ils instaurent des projets qui sont au service de leurs communautés et ce, en lien avec d’autres groupes de développement durable et des représentants régionaux d’agences gouvernementales. La reconnaissance de la contribution à l’économie sociale de ces groupes sera déterminante dans l’appui et le soutien que ces groupes tentent d’obtenir auprès des différents paliers de gouvernements. En d’autres termes, c’est dans la mesure où l’on reconnaît toutes les contributions du travail de ces regroupements au développement des capacités, du leadership et des connaissances locales que ceux-ci pourront faire valoir leur légitimité. L’implication des associations de bassin versant dans la gestion des systèmes de fosses septiques au Nouveau-Brunswick a pour but de montrer le potentiel de ces associations au développement durable et ce tant dans ses aspects environnementaux, économiques que sociaux.

Résumé de la phase 3 :
Depuis la fin des années 1990, des associations de bassin versant travaillent à la gestion durable dans les différentes régions biogéographiques de la province du Nouveau-Brunswick. D’abord créées pour la gestion de programmes de classification des eaux du Ministère de l’Environnement, ces associations ont entrepris des mandats beaucoup plus larges englobant d’autres secteurs d’activités en lien avec le développement durable. Ces groupes, comme bien d’autres du secteur à buts non-lucratifs, sont confrontés à des difficultés liées à la viabilité financière. Cette recherche examine les différents programmes et initiatives de financement en place au N.-B. et examine des mécanismes existants ailleurs permettant une meilleure viabilité de ces associations. Pour ce faire, des entrevues ont été réalisées auprès de différents acteurs du secteur de même qu’une revue de la littérature sur le sujet. Les résultats montrent qu’effectivement les mécanismes de financement sont peu efficaces surtout parce qu’ils offrent peu de stabilité à moyen et long terme. Le rôle des associations de bassin versant n’est pas enchâssé dans une politique provinciale et il semble qu’une meilleure reconnaissance de ses
retombées pour les communautés soit encore à faire. Également, les entrevues ont permis de constater que les partenariats créés par les ABV varient beaucoup d’un groupe à l’autre et une exploration avec de nouveaux partenaires pourrait générer des pistes pour une meilleure reconnaissance et un financement plus stable.

4.2 Participation publique en gestion forestière:
Expériences, perceptions et attentes des organismes de l’économie sociale du N-B

Research Partners - Partenaires de recherche
Stephen Wyatt, Foresterie, Université de Moncton, Campus d’Edmundston
Solange Nadeau, Ressources naturelles Canada
Donald LeBlanc, La Coop des travailleurs forestiers de McKendrick
Peter Demarsh, New Brunswick Federation of Woodlot Owners Inc (Association des propriétaires de lots boisés du N-B)
Diane Landry, Faculté de foresterie, Université de Moncton (Campus d’Edmundston) (étudiante)

Project Description - Description du projet
Ce projet porte sur la participation publique à la gestion forestière au Nouveau-Brunswick. Il vise à explorer les opportunités qui sont offertes aux citoyens pour s’impliquer dans la prise de décision (processus participatifs) et à analyser plus en profondeur la contribution des organismes de l’économie sociale à ces processus. L’implication de groupes d’intérêts dans un processus participatif devrait leur permettre de faire valoir leurs idées et leurs besoins et de façonner le système dans lequel ils coexistent avec les autres groupes d’intérêts.

Une première analyse de la situation a mis en relief une faible participation de certains organismes de l’économie sociale qui utilisent le territoire forestier (par ex.: coopératives et offices de commercialisation) aux processus participatifs existant dans la province. Cependant, ces organismes sont souvent directement affectés par les décisions prises en matière de politique et d’aménagement forestier. Notre projet tentera de comprendre comment les organismes de l’économie sociale du Nouveau-Brunswick font valoir leurs intérêts et quel moyen ils suggèrent afin d’améliorer les mécanismes de participation publique en foresterie.

Cette étude exploratoire permettra d’identifier les facteurs qui facilitent et contraignent la participation des organismes d’économie sociale à la gestion des forêts du Nouveau-Brunswick. Elle dégagera également des constats propres à améliorer les processus de participation publique afin de les rendre efficaces et constructifs pour une plus grande gamme d’acteurs du milieu forestier.

4.3 L’utilisation de compost comme pratique visant une plus grande viabilité des sols chez les fermiers du sud-est du Nouveau-Brunswick (Coopérative de la Récolte de chez nous (RCN))

Research Partners - Partenaires de recherche
Omer Chouinard, Gilles Martin et D. Courchesne, Université de Moncton, Campus de Moncton
Léopold Bourgeois, La Coop. La Récolte de chez-nous (RCN)
Didier Michaud (étudiant), Université de Moncton

Project Description - Description du projet
La Récolte de chez nous est une coopérative agricole située dans le sud-est du Nouveau-Brunswick. Certains producteurs de cette coopérative voudraient utiliser davantage de compost comme amendement organique pour la durabilité des sols. En collaboration avec l’Université de Moncton, une étude a donc été menée dans le but d’estimer la demande en compost au sein de la coopérative ainsi que d’évaluer la possibilité de mettre en place un site de compostage pour les agriculteurs de la région. Cette étude a pris la forme d’une enquête auprès des membres de la coopérative, des producteurs de compost et des entreprises agroalimentaires et forestières de la région. D’après les informations que nous avons recueillies, il est peu réaliste d’établir un nouveau site de compostage dans cette région. La complexité d’une telle entreprise, l’expertise requise et les coûts d’installation et de fonctionnement sont importants. Les entreprises de compostage du sud-est sont déjà en compétition pour les matières premières, dont la source de carbone. De plus, nous pensons qu’il serait peu probable de réussir à produire du compost à meilleur coût que ce qui est présentement offert sur le marché puisque les déchets organiques disponibles dans la région sont limités et rarement gratuits. Les entrevues réalisées ont aussi permis de démontrer que la demande en compost de la part des agriculteurs de la coopérative est encore limitée quoique plusieurs ont manifesté l’intention d’en faire davantage usage à l’avenir. Les principaux obstacles à l’utilisation du compost par les agriculteurs demeurent le manque de connaissance quant à l’utilisation du compost et le coût élevé du produit, notamment associé aux coûts du transport. De plus, les producteurs ne sont pas convaincus qu’ils pourront vendre leurs fruits et légumes plus chers même s’ils adoptent des pratiques plus saines pour l’environnement. La mise en place de partenariats entre les différents intervenants (producteurs agricoles, producteurs de compost, agences gouvernementales et consommateurs) sera donc cruciale pour effectuer un virage vers des pratiques agricoles durables.

Project Description - Description du projet

Mots clés : changement climatique, érosion, inondations, adaptation, approche intégrée, approche participative, prise de décision.

Le Goulet and Pointe-du-Chêne are two coastal communities facing serious problems resulting from flooding. Since 2003, researchers have been involved in an action research to involve the community in a decision making process focussing on adaptation measures to these problems. The community engagement process involves inventory of local perceptions, knowledge and preoccupations, awareness and information building and decision making through focus group discussions. Semi directed interviews were held prior and at the end of the process to gather the data. Results show that participants have been using some adaptation techniques although they lack resources and direction.
The engagement process has resulted in an important change in adaptation approaches envisioned for the future in one community and has brought forward some new solutions in both areas. Participants view the process as having lead to more sustainable solutions or as a means to provide more credibility to solutions envisioned with which to approach governments for resources. Researchers need to better identify objectives and possible outcomes from the start of the process in order to encourage a broader participation.

**Key words:** climate change, adaptation, erosion, flooding, coastal communities, decision making, participatory process.

**Outputs – Résultats**

4.8 Impacts of the NB regulatory process on the small scale cranberry farmer

Research Partners - Partenaires de recherche
Gilles Martin, Consultant
Pricette Dovonou-Vinagbè, Masters Student
Omer Chouinard, Université de Moncton

Project Description - Description du projet
Discussions with the New Brunswick Cranberry Association have revealed that new farmers are struggling with the regulatory process surrounding environmental approvals for cranberry bogs. With the costs and time involved for the permit approvals and the necessary information that needs to be provided, some feel that the small scale farmer will be excluded from this relatively new agricultural sector. This research based on literature review, was initiated in order to provide input on some of the regulatory obstacles and how other jurisdictions have dealt with similar issues. The literature shows that NB has a very strong Policy for wetland conservation and there are difficulties in ensuring that conservation and other socio-economic benefits are in balance. Other areas, notably in the US, have a less restrictive regulatory process surrounding wetlands and some exclusions or general permits have been designed for agriculture. The authors believe that sustainable developments warrants attention to ensure small farmers are treated equitably and some recommendations are made in order to simplify the existing regulatory process.

5.1 Financing the Social Economy

Research Partners - Partenaires de recherche
Peter Hough, Canadian Worker Co-op Federation and Canadian Community Investment Network Co-op
Seth Asimakos, Saint John Community Loan Fund and CCINC
George Karaphilis, Shannon School of Business, Cape Breton University, Sydney NS
Roger Wehrell, School of Business, Acadia University, Wolfville NS

Project Description - Description du projet
In 2006, the Scan of Financing Providers was conducted as a preliminary study to a more comprehensive survey of the financing needs and challenges facing organizations in the Social Economy. The purpose of the scan was to identify and describe the providers and types of financing instruments available to social economy enterprises in Atlantic Canada. The study interviewed 4 key informants from a bank, credit union and development funds. A report was provided by John Maddocks from Saint Mary’s University summarizing the interviews and identifying common themes to be pursued in the next phase.

In 2008 the project proceeded to probe the demand for financing: to identify the financing needs and challenges facing social economy organizations. Samples of organizations representative of the wide range of types of SEOs in Cape Breton and Saint John NB were surveyed; probing for the different financing strategies and financial management strategies pursued by the various organizations and the differing measures of success associated with the different strategies. In 2009 the research continued with surveying the SEOs in Halifax, PEI, and Newfoundland and with surveying financiers also. Future research will estimate the size of unmet financing demand in the SE of Atlantic Canada and will explore the key factors success for successful financing.

The research lead is George Karaphilis from Cape Breton University, with oversight from Seth Asimakos of the Saint John Community Loan Fund and Peter Hough representing the Canadian Community Investment Network. The results of the survey will enhance the capacity of organizations in the Social Economy to access financing and to influence policy regarding the availability of financing to them.

5.2 Fogo Island Cooperative

Research Partners - Partenaires de recherche
Judy Haiven, Department of Management, Saint Mary's University, Halifax NS
Bernadette Dwyer, Fogo Island Co-op, Fogo Island NL

Project Description - Description du projet
This fishing company’s success is directly related to its relations with its shareholder fishermen, the employees, their union and the wider community. The Labrador Fishermen’s Union Shrimp Company started in 1978 as a co-operative and after some poor business ventures and economic downturns dissolved as a co-operative. In 1982 it became a company, in which each fisherman was entitled to one vote and there was a commitment to keeping the profits with the organization and the communities. This project contrasts the Union Shrimp Co. with the Fogo Island Co-op, and attempts to locate the strengths and weaknesses in each organization and explore relations with the community in each situation.

5.3 Generally Accepted Accounting Principles (GAAP) and Cooperative Accounting

Research Partners - Partenaires de recherche
Tom Webb, Co-operative Management Education Co-operative / Centre of Excellence in Accounting & Reporting for Co-operatives, Halifax, NS
Elizabeth Hicks, Business Administration & Tourism & Hospitality Management MSU, Halifax, NS

Project Description - Description du projet
This project involves working with the Centre of Excellence in Accounting & Reporting for Co-operatives (CEARC) and Co-operative Management Education Co-operative (CMEC) along with its member co-operatives to develop a Statement of Recommended Practice (SORP) for Co-operative Reporting to guide co-operatives in the application of Generally Accepted Accounting Principles (GAAP) and to incorporate the “co-operative difference” in co-operative reports. Since Generally Accepted Accounting Principles do not currently adequately meet the unique reporting needs of co-operatives and some GAAP are not compatible with the purpose of co-operative business, this project intent is to develop a Statement of Recommended Practice for Co-operative Reporting thus improving their understandability and accountability to members and other users.

5.5 Diagnostic tool for co-operative firms

Research Partners - Partenaires de recherche
Tom Webb, Masters of Management, Saint Mary’s University/Council of Ministers of Education Canada (CMEC), Halifax NS
Peter Hough, Canadian Worker Co-op Federation (CWCF), Kentville NS
Sonja Novkovic, Economics, Saint Mary’s University, Halifax NS

Project Description - Description du projet
The aim of this project is to develop a performance diagnostic tool for worker co-operatives. The tool is an extension of the existing tool used by Ryszard Stocki and his team that measures the impact of worker participation on the performance of the organization. Our purpose is to design a tool specifically aimed at co-operatives as value-based organizations. The purpose is to link performance indicators to the co-operative values, as well as include performance measures beyond profitability, based on, but not limited to, the ICA co-operative principles and values.

5.7 Measuring the Co-op Difference

Research Partners - Partenaires de recherche
Elizabeth Hicks & Leslie Brown, MSVU, Halifax NS
Roméo Cormier and Monique Bourque, Co-op Atlantic
André Leclerc, Université de Moncton, N-B

Project Description - Description du projet
The purpose of this project is to develop indicators and measures of the “co-operative difference” including a tool for sustainability reporting. Further, we will study the process of participating in this research affects strategic planning and operations in the partner co-operatives.

Working with our community partner, Consumers’ Community Co-operative (CCC), we began the process of identifying what CCC stakeholders perceive to be the “co-operative difference”. However in January 2008, CCC merged with Co-op Atlantic and ceased to exist.

With the dissolution of CCC our research proceeded in two important areas: we completed an initial scan of the literature on publicly available indicators and measures of corporate social responsibility (csr), noting their key characteristics; and we reviewed the csr reports of Canadian co-operatives (including credit unions) to assess their publicly stated motives for preparing csr reports, what measures are in use, how the reports have affected the organization, to what extent they engage stakeholders in the development and choice of indicators and measures, and the extent to which social reporting is embedded in the organization’s practice as a tool guiding management and the Board.

Building on the above, we are now working with Co-op Atlantic, our new community partner, to develop a tool to define, measure and help co-operatives grow their “co-operative difference”. A draft tool has been prepared. We are now working with co-operatives (members of Co-op Atlantic) which have volunteered to participate in a pilot project to: modify and refine the tool reflecting the priorities of their co-operative; test the modified tool on their co-operative; and reflect on and share their experiences of working with the tool. A revised tool and manual will be developed, drawing on the pilot co-operatives’ experiences.

5.10 Employment law for Canadian Worker Co-operatives

Research Partners - Partenaires de recherche
Dr Sonja Novkovic, Dr Larry Haiven, Saint Mary’s University, Halifax, NS
Peter Hough and Hazel Corcoran, Canadian Worker Co-op Federation

Project Description - Description du projet
Worker co-operatives have a unique place under employment law. The employees of the organization are also owners. Therefore workers can set the rules, and working conditions. What is the relationship between Canadian worker co-operatives and employment laws across Canada? What is the definition of an employee? What are the rights of co-op members, the rights of employers and the role of trade unions in worker co-operatives? The objective of this project was to create a paper which could be used as a guideline for worker co-operatives. This project also wanted to encourage discussion about employment law, the role of trade unions and worker rights in Canadian co-operatives.

6.1 Bridges and Pathways, or Detours and Dead Ends: Evaluating a Collaborative Web Community

Research Partners - Partenaires de recherche
Penelope Rowe, Community Services Council, St. John’s NL
Ivan Emke, Sir Wilfred Grenville College, Memorial University, Corner Brook NL
Darlene Scott, Community Services Council, St. John’s NL
Team Members, SES/ÉSD Network

Project Description - Description du projet
This project is a study on the efficacy of a web-based community for a complex network, using our own evolving social economy project network as a case study. With this network, we have the advantage of being able to study it from its inception. In addition, this web community has been designed with the needs of the community taken into consideration. (For example, a brief survey was taken at the first network meeting in Halifax in February 2006, asking team members about which communication tools they would use in a web community.)

In an age where the potential of internet communication is often touted without restraint, it is crucial to develop tools to evaluate the effectiveness of these technologies. While a great deal of attention is paid to issues of access to hardware and the diffusion of technologies, we have less information on the actual usage of these technologies, or which of the technologies are more likely to be integrated into a participant’s work activities. For practical reasons, we need to have a better sense of whether technologies are meeting our expectations. A project which offers a view of the challenges of network development, followed by two years of evaluation of the take-up of the network, will be a valuable contribution to the literature (both community-based and academic).

6.2 Introducing a web community software to a complex social economy organization

Research Partners - Partenaires de recherche
Penelope Rowe, Community Services Council, St. John’s NL
Ivan Emke & Patrick Shanahan, Sir Wilfred Grenville College, Memorial University, Corner Brook NL
Philippe Enguehard, Jamie Hollett & Darlene Scott, Community Services Council, St. John’s NL
Bev Kirby & Shannon Park, Community Education Network, Stephenville NL

Project Description - Description du projet
The purpose of this project is to introduce the technology of a web community to an existing social economy organization, the Community Education Network (hereinafter referred to as the Network), to provide members of the Network training on the technology, and to evaluate its use by the Network. This will not only allow us to study the web community technology itself, and to make changes to it, but we will also be able to research how an existing organization makes use of this potential. We would like to know the following:

- Do members of the Network use the technology, in both the short and the longer term?
- Is the technology easy to use for workers, in general?
- Which aspects of the web community are used most often?
- What are the barriers to the use of the web community?
- What does the web community technology do well?
- What does the web community technology not do well?
- Does the web community assist the Network members in better understanding each others’ roles?
- Does the web community help the Network in its management structure?

6.4 The Uses and Gratifications of Communication Technologies for SE Actors: A survey of Atlantic SE organizations’ use of communications tools

Research Partners - Partenaires de recherche
Penelope Rowe, Community Services Council, St. John’s NL
Ivan Emke, Social/cultural studies, Sir Wilfred Grenville College, Memorial University, Corner Brook NL
Darlene Scott, Community Services Council, St. John’s NL

Project Description - Description du projet
This project will focus on an evaluation of the uses of various communication tools in Social Economy (SE) organizations. The tools will include internet technologies, local and regional newspapers, radio, television (including community cable television), newsletters, bulletin boards and interpersonal communications (either via telephone or face-to-face). We are interested in issues around not only access to communications technologies, but also the mix of uses which occur on a regular basis.

A primary element of this project would be to examine the use of these communication tools for capacity-building within SE organizations. By doing so, we can also develop suggestions for more effective use of communications tools in building social economy organizations and mobilizing volunteers, members and the public.

In some standard discussions in the literature, there is an implicit understanding that people will choose, and use, specific communication tools to achieve specific outcomes. In addition, it is assumed that each tool not only has its own uses, but also its own “gratifications” (or functions and values, some of which are unstated or unknown when the tool is first chosen). Some of these gratifications may also be unrelated to the direct strategic reason for the initial use of the tool.

It is also the case that we use a variety of communication tools in our everyday life, some of which work better for certain functions than others. We are interested in these issues at the level of the social economy organization. What is the mix of tools used? What are the expected outcomes of these uses? Why are the tools used in the first place? What are the perceived gratifications of these uses, for the organization?

The communication needs of a social economy organization can be very complex. The organization may have a variety of functions, and they may need to communicate about their services (or products). They may need to recruit and retain volunteers. They may need to solicit support and donations. They may need to keep in touch with governance actors and funding sources. And they may need to network with other like-minded organizations. Which communication tools are used for which of these functions?

Project Description - Description du projet
This Subnode 6 project will explore e-mail’s effectiveness as a promotional medium within the Newfoundland and Labrador community sector. The Community Services Council of Newfoundland and Labrador (CSC) frequently promotes its programs, events, workshops and sector news via e-mail to several hundred community sector contacts in the province. While CSC has done some limited follow up of the effectiveness of its e-mail promotions, it has yet to do a thorough examination. This project will seek to clarify who reads these e-mails, the factors that influence their likelihood of reading them, and how this communication influences their decision making.

Project Description - Description du projet
One of the communications tools which has been emerging since the rise of widespread access to broadband internet-based connectivity is the use of web-based seminars. They have spawned their own term, “webinar,” and have been adopted as one way for organizations to offer resources and information to geographically-dispersed individuals and groups at a fraction of the cost of “live, real-time” seminars (although with webinars, the costs are shared around to all organizations and individuals who wish to participate, as they require a certain level of technology and internet service). Nevertheless, they are seen as a way to collapse distance and time and connect like-minded individuals or people in similar sectors.

6.8 Analysis of Community-Based Radio as a Communication Tool for Groups in the Social Economy

Research Partners - Partenaires de recherche
Ivan Emke, Sir Wilfred Grenfell College, Corner Brook, NL

Project Description - Description du projet
For organizations, the struggle to communicate their messages within a cultural context that is saturated with information has become a persistent issue. In particular, for social economy organizations there is often a need to inform community members of their goals and activities. This can assist in recruiting volunteers, in offering their services to new clients, in soliciting donations, and in cultivating general good-will within the community. The need to find innovative ways of communicating with the public, in an age of information clutter, is thus crucial.

The focus of this project is to analyze the potential benefits of using community-based radio in building support for and generating interest in social economy organizations. The specific form of community-based radio in this study is Special Events radio broadcasts. These are FM broadcasts which are short-term and are licensed through Industry Canada. They use portable FM transmitters and antennae, and they are organized in collaboration with community organizations. The broadcast relies on local people and community groups to generate content.

Such broadcasts have been taking place occasionally throughout Atlantic Canada, but largely in Newfoundland and Labrador. One of the researchers on this project has been involved with many of these broadcasts. Thus, for this study we have good archival data from a number of community radio broadcasts, in a number of provinces. We will use the archives from four community broadcasts, which were held in Tweed (ON), Vermillion (AB), Wolfville (NS) and Burnt Islands (NL). In addition, the study will also participate in two upcoming broadcasts (in Cow Head and Twillingate, NL). In addition to the archival work, and the observation and participation in radio events, the project will interview social economy actors who were involved in community radio broadcasts.

Note: When we refer to “social economy actors/organizations,” we are referring to a broad category of groups which are included under some ecumenical definitions of the social economy: these include voluntary organizations as well as social enterprises and even co-operatives.

S.2 Let Them In, But Keep Them Out: Liminality of the First-born Chinese Prince Edward Islanders (SN1)

Research Partners - Partenaires de recherche
Student: Laura Lee Howard, UPEI, Charlottetown PEI
Supervisor: Colleen MacQuarrie, Psychology, UPEI, Charlottetown PEI

Project Description - Description du projet
It is important for Prince Edward Islanders to be aware that if they are not Mi’kmaq, then they descend from immigrants. All immigrants go through similar processes in integrating. According to this research, this process can be more intense and more difficult on an Island.

Fifteen participants (the children of the original Chinese settlers) completed a semi-structured interview process that focused on the participants’ experiences of growing up on Prince Edward Island. The interviews were transcribed and analyzed using an iterative process grounded in the data, and informed by themes of islandness including boundedness, particularism, and migration. A model emerged which became titled “Circle of Community Storytelling and Island Connectivity”. It suggests how these themes of islandness interplay with the concepts of liminality, resilience and integration to inform and encourage locally grown sub-national island jurisdiction immigration policy.

The first Chinese person to arrive on Prince Edward Island came in 1851. Over one hundred and fifty years later, this community remained hidden in the shadows. At the beginning of the twenty-first century, through the process of storytelling, this community transitioned from liminality to their rightful place in the Island story. Listening to the voices and stories of the first-born Chinese Islanders provides an opportunity to increase awareness and understanding of those who are not of the majority ancestry group. The research also provides information that may assist government and SE organizations supporting immigrants to formulate programs and policy that works well both for those who choose to come to the Island, and for Prince Edward Islanders.

S.3 Domestic Violence Research Project (SN2)

Research Partners - Partenaires de recherche
Student: Wendy Adams, Master of Arts in Island Studies, UPEI, Charlottetown PEI
Supervisor: Colleen MacQuarrie, Psychology, UPEI, Charlottetown PEI
Partners: SAGE, Inc. and Women’s Network PEI, Inc.

Project Description - Description du projet
Primary data collection with eight justice service front line delivery workers (4 NS/4 PEI) to review services provided for female victims of domestic violence in small island/rural communities between NS and PEI - what is working/not working from the perspective of these workers; what are the challenges faced by these front line workers; what are their recommendations for change to assist them to do their jobs more effectively and efficiently. Interviews will be conducted with RCMP, and provincial government departments of victim's services, community and correctional services. The data analysis and findings will be verified by the interviewees, and later shared in two focus groups with NS and PEI (SN2 partners), to review the recommendations from the point of view of social economy community organizations working to support victims of domestic violence. Following verification of focus group analysis and findings, the final report (thesis) will be shared on the SN2 social economy project website.

S.4 Growing New Brunswick from the Ground Up: The Policy Context for Co-operatives in New Brunswick (SN1)

Research Partners - Partenaires de recherche
Student: Erin Hancock, UNB, Fredrickton NB
Supervisor: Luc Thériault, Sociology, UNB Fredrickton NB

Project Description - Description du projet
This research explores the relationship between co-operatives in New Brunswick, as community-owned, local enterprises and government policies and programs. Through a review including academic, government and co-operative sector literature, a policy scan, and interviews with both representatives from the co-operative sector (n=12) as well as government (n=2), this thesis reveals opportunities to better support New Brunswick co-operatives. These recommendations include opening programs for business development to be accessible to co-operatives (educating staff as well as creating program guidelines conducive to co-operatives) as well as updating legislation that is more than 30 years old in order to reflect the current economic climate in the province. Through developing a more favorable policy environment in New Brunswick, citizens can become involved in developing their own communities through jointly-owned enterprises. The social as well as economic activities of co-operatives can help serve policy goals as well, such as employment creation, self-sufficiency, service delivery and economic development. Although governments may benefit from co-operatives, the outdated legislation and lack of supportive programs do not reflect this potential. Both government (through policy making) and the co-operative sector (through advocacy and public education), however, are necessary to help increase the public profile of co-operatives and work together to create stronger policies. As autonomous organizations, co-ops have a responsibility to help themselves and each other, however, just as government supports other enterprises (through policies and development programs), so too would it be valuable to support co-ops, as social enterprises, in a similar manner. Moreover, co-operatives warrant the attention of government as well as more favorable policies because of their contributions to communities, the economy, and the labor force in addition to their potential to help address current policy goals within the Province of New Brunswick.

S.10 Prince Edward Island and Newfoundland: A Comparative Assessment of Two Islands As Viable Destinations for Immigrant Entrepreneurs (SN2)

Research Partners - Partenaires de recherche
Crystal Fall, Master of Arts in Island Studies, University of Prince Edward Island (UPEI)
G. Baldacchino, Supervisor, UPEI, Charlottetown PEI
K. Arsenault, PEI Newcomers Association

Project Description - Description du projet
The purpose of the study is to examine the social and economic experiences of international immigrant entrepreneurs who have settled in Prince Edward Island (PEI) and Newfoundland (NL) over the past two decades. Through the collection and analysis of oral histories, this study will review and assess the challenges that immigrant entrepreneurs face in these two different locations. This study will also consider the push and pull factors that originally brought these immigrants to Canada to clarify what may affect their intentions to stay. Overall, this is an examination of integration and retention issues.

In keeping with the strength of the Master of Arts Island Studies program, this research will be multi-disciplinary and multi-faceted while comparatively considering the two islands of NL and PEI within the larger framework of the history of immigration to Canada’s Atlantic Region. Furthermore, a priority of this study is whether or not the issues that preoccupy immigrant entrepreneurs may be magnified by the geographic qualities embedded in islands. By setting the findings within larger regional and historical contexts, this study will contribute to our understanding of current issues regarding entrepreneurial immigrant integration and retention.

S.11 Contribution d’une entreprise d’économie sociale à l’alimentation de proximité et à la sécurité alimentaire : le cas de la RCN dans le sud-est du N.-B. (SN4)

Research Partners - Partenaires de recherche
Étudiant : Didier Michaud, Université de Montréal (UdeM)
Directeur de thèse : Omer Chouinard, Département de sociologie UdeM
Partenaire : Gilles Martin, Récolte de chez nous (RCN)

Project Description - Description du projet
Notre recherche a été menée lors de cette année universitaire dans le cadre du programme de Maîtrise en Étude de l’environnement à l’Université de Moncton. Elle est née d’un partenariat entre des chercheurs de l’Université de Moncton et les membres d’une coopérative agricole : La Récolte de chez nous (RCN). À la lumière de l’approche de l’économie sociale, de la sociologie de l’association et du partenariat, de l’innovation sociale et du développement territorial durable, l’objectif général de notre projet de recherche est de comprendre comment les principes de l’économie sociale et plus particulièrement la coopération et les partenariats qui en découlent peuvent devenir dans certains cas des vecteurs d’un développement durable.

Les questions de recherche spécifiques de notre projet et les objectifs visés sont les suivants :

1. Quelle est la volonté des membres de la coopérative de la RCN d’adopter des pratiques plus durables? Quel est le rôle des différents partenaires (coopérative, membres, agents, consommateurs, etc.) dans ce processus? L’objectif consiste à déterminer quels rôles jouent la coopération et les partenariats en ce qui concerne les changements vers l’adoption de pratiques plus durables chez les membres de la RCN.
2. Quels sont les éléments constituant le lien social entre producteurs et consommateurs (rural-urbain) et comment est-il possible de participer à son renforcement? L’objectif est d’identifier les éléments clés qui jouent un rôle dans la coopération et les partenariats dans le renforcement du lien entre producteur et consommateur, à l’ultime étape de participer au développement d’un plus grand partenariat entre les membres de la RCN et le marché local du Grand Moncton.

Au niveau méthodologique, nous utiliserons essentiellement l’approche qualitative : l’analyse documentaire, l’entretien semi-dirigé et les rencontres de groupes témoins. Les résultats de la recherche correspondront aux demandes majoritaires des membres, ils pourront compter sur des informations qui permettent de renforcer les capacités de la coopérative afin qu’elle soit en mesure d’offrir des services de qualité à ses membres face à une mondialisation des marchés agroalimentaires; le lien social entre producteurs ruraux et consommateurs urbains du territoire du sud-est du NB, leur permettant ainsi d’obtenir un prix décent et équitable et finalement, de promouvoir, au sein de la coopérative, l’adoption de pratiques agricoles plus durables tout en contribuant à la sécurité alimentaire.

S.12 At the intersection of a crisis? Examining the ability of New Brunswick’s non-profit organizations to meet the need for home care in the twenty-first century (SN1)

Research Partners - Partenaires de recherche
Student: Rose Cole, UNB, Fredericton NB
Supervisor: Luc Thériault, Sociology, UNB Fredericton NB

Project Description - Description du projet
The focus of the MA research will center on identifying how broad social changes are unfolding in New Brunswick to discover how these changing social trends may present challenges to nonprofit agencies in their capacity to provide home care services in the province. The purpose of this case study will be to explore both the social factors and the institutional processes that structure the provision of home care and the delivery of home care services and programs by nonprofit organizations. This analysis can be articulated by the following question: How do New Brunswick’s nonprofit organizations assess their ability to provide home care services to the province’s most vulnerable groups? For this qualitative study to capture the perspective of nonprofit agencies in the province, I intend to interview organization directors and managers who were identified from the Family and Community home support list in my honours study. This would entail conducting up to twenty interviews throughout the province in the seven regional areas that provide publicly funded services. In addition to the interview process I will undertake a document and content analysis of the various processes that structure the provision of home care such as the composition of staff and volunteers in organizations, the education and training requirements for staff and volunteers, home support standards, and government policies and contracts.

S.13 Examining the Risk of Lost Knowledge with Personnel Changes in Small Nonprofit Organizations on Prince Edward Island (SN2)

Research Partners - Partenaires de recherche
Barbara Groome Wynne (grad student), University of Alberta, Edmonton AB
Dr. Irené Novaczek, Institute of Island Studies, UPEI, Charlottetown PEI
Dr. Kirby Wright & Dr. Marco Adria, University of Alberta, Edmonton AB

Project Description - Description du projet
Building on the findings of the sub-node 2 project, Bridging Public Investment and Social Value: An examination of the supports for the Social Economy on Prince Edward Island, the proposed study will examine how small nonprofit organizations (NPOs) are managing the risk of lost knowledge associated with changes in key personnel. The project will be conducted in three phases: a sector survey will be administered for the purpose of assessing the overall risk of lost knowledge; semi-structured interviews will be conducted to inquire into the experiences organizations have had in retaining the knowledge of exiting employees; and using the findings of the survey, the interviews and Bridging Public Investment and Social Value, a customized knowledge management toolkit prototype will be developed and delivered in a workshop for small NPOs. Theoretically, the study will examine how explicit and tacit knowledge is retained and transferred, and it will investigate the impact social capital may have on these processes. From a pragmatic standpoint, the project strives to assist small NPOs, a sector largely ignored in knowledge management research, in finding ways to mitigate the risk of lost knowledge and to reduce the associated consequences on organizational sustainability.

Objectives:
   a) Assessment of small nonprofit knowledge management risks and practices;
   b) Development of a knowledge management toolkit prototype customized for small nonprofit organizations to mitigate the risk of lost knowledge due to staff attrition.

There are ongoing opportunities for graduate students, academics, community organizations and others to become involved with our Network. Please contact the Director, the Network Coordinator, or one of the Sub-node Coordinators, or check our website for more information:  http://www.msvu.ca/socialeconomyatlantic/  For more information on the other regional nodes, all part of the Canadian Social Economy Research Partnerships, please visit the Canadian Social Economy Hub’s website:  www.socialeconomynetwork.ca/hub/

Il existe continuellement de nouvelles occasions de recherche pour les étudiants de cycles supérieurs, les universitaires, les organismes communautaires et autres qui souhaitent s’impliquer dans notre Partenariat. Veuillez contacter la directrice, la coordinatrice du Partenariat ou l’un des coordinateurs des sous-centres, ou consulter notre site web pour de plus amples renseignements : http://www.msvu.ca/socialeconomyatlantic/  Pour de plus amples renseignements sur les autres centres régionaux, qui font tous partie des Partenariats canadiens de recherche en économie sociale, veuillez consulter le site du Centre canadien d’économie sociale : www.socialeconomynetwork.ca/hub/

Director - Directrice
Dr. Leslie Brown, Professor, Sociology/Anthropology, Mount Saint Vincent University

Co-Directors – Co-directeurs
Mr. Seth Asimakos, Manager, Saint John Community Loan Fund
Ms. Penelope Rowe, Chief Executive Officer, Community Services Council Newfoundland and Labrador
Dr. Luc Thériault, Associate Professor, Sociology, University of New Brunswick

Sub-node Coordinators - Coordinateurs des sous-centres
SN1: Mapping and Policy Analysis
   Dr. Luc Thériault, Associate Professor, Sociology, University of New Brunswick, Fredericton, NB

SN2: Mobilization: Inclusion and Empowerment in the Social Economy
   Dr. Irené Novaczek,
   Director, Institute of Island Studies, University of Prince Edward Island, Charlottetown, PEI

SN3: Mobilization: Food Security and Community Economic Development

   Dr. Ivan Emke, Associate Professor, Social/Cultural Studies, Sir Wilfred Grenfell College, Memorial University of Newfoundland, Corner Brook, NL

Network Coordinator - Coordinatrice du Partenariat
Noreen Millar, M.A.
Our Partners - Nos partenaires

To date, these are many of the partners currently involved in the Network. This list will continue to grow as new collaborations are formed and new research projects develop. À ce jour, les partenaires dont la liste suit sont actuellement engagés dans le travail de recherche du Partenariat. Cette liste continuera à s’allonger au fur et à mesure que de nouvelles collaborations se formeront et de nouveaux projets seront lancés.
