This free event is presented by the Canadian Institutes of Health Research and the Nova Scotia Centre on Aging

What features of nursing homes influence resident quality of life? What is “care by design” and is it making a difference in the care in nursing homes? How can medical services be provided to reduce emergency department visits? How can nursing homes use this information? Join us for an informal public discussion about the results of two significant studies specifically designed to understand innovations in Nova Scotia nursing home care.

Experts:

Janice Keefe PhD
Professor, Department of Family Studies & Gerontology and the Lena Isabel Jodrey Chair in Gerontology, Mount Saint Vincent University.

Ann McInnis RN, MSN
