

PROPER HAND WASHING

Washing your hands frequently with soap and water is the best way to reduce the spread of germs.

1
Wet your hands with warm running water

2
Add soap and scrub for 15–20 seconds

3
Wash backs, thumbs, between fingers, and under nails

4
Rinse off soap under running water

5
Dry your hands with a clean towel

6
Turn off tap with a towel

When soap and water are not available, alcohol-based hand sanitizers can be used if hands are not visibly soiled.
